The university administration works to achieve the principle of equal opportunities in the university community, and the concept of equal chances aims to ensure that everyone, regardless of their gender, race, religion, or any other specified characteristics, has equal opportunities to access resources, rights, and benefits in society.

The Equal Opportunities Unit takes a series of measures and policies to contribute to achieving this goal. For example, it can work on combating discrimination, promoting awareness of human rights, and encouraging community partnership to ensure equal opportunities. The unit aims to create a positive society where everyone is equal in terms of opportunities and treatment, and to reduce discrimination and differentiation based on any unfair basis.
