

Mohammed Abdel-Nasser received his B.E. in mechatronics section from Mechanical Engineering Department, Assiut University, Egypt, in 2016. Then he worked toward the M.Sc. degrees from late 2017 till now at Mechanical Engineering Department, Assiut University, Egypt. Starting from March, 2018 he is a teaching assistant in Mechanical Engineering Department, Assiut University. His major research interests are in the fields of Robotics Engineering, Automatic Control, Artificial Intelligence Techniques, and Surgical Robots. His current research focuses on Hybrid Mechanisms of Surgical Robot Arm, Continuum Surgical Robots, Tendon-Driven Mechanisms, Concentric Tube Mechanisms, and Design & Control of Surgical Manipulators.
