Education

PhD in Mechanical Engineering *December, 2008*

University of Toronto, Canada.

Supervisor: Prof. Aaron Wheeler, Department of Chemistry

Thesis title: Digital Microfluidics for Integration of Lab-on-a-Chip Devices.

MASc in Mechanical Engineering *August, 2003*

Concordia University, Montreal, Canada

Supervisor: Prof. Ibrahim Hassan

Thesis title: Numerical Simulation of Transient Performance of Viscous Micropumps.

Bachelor of Engineering *August, 1998*

Department of Mechanical Engineering, Assiut University, Egypt

Thesis title: Design and Manufacturing of an Evaporative Air Cooler

Employment

Assistant Professor *September, 2010 - Present*

Mechanical Engineering Department, Assiut University, Egypt

Adjunct Assistant Professor *January, 2015 - Present*

Center of Nanotechnology

Zewail City of Science and Technology, Egypt

Director *November, 2011 - Present*

Knowledge Transfer office (KTO), Assiut University, Egypt

The KTO is responsible for promoting and carrying out technology transfer activities (IP protection and commercialization) at Assiut University.

Post Doctoral Fellow *January, 2009 – September, 2010*

Department of Surgery, University of Toronto

Project title: High-Speed Electromechanical Characterization of Biological Cells for Bladder Cancer Diagnosis.

Research Assistant *September, 2004 – December, 2008*

Wheeler Microfluidics Laboratory, Department of Chemistry, University of Toronto.

Assistant lecturer *September, 2003 – August, 2004*

Mechanical Engineering Department, Assiut University, Egypt

Research Engineer (part time) *April, 2003 – August, 2003*

Hardt Equipment Manufacturing Inc., Montreal, Canada.

Research Assistant *May, 2001 – September, 2003*

Concordia University, Montreal, Canada

Teaching Assistant

October, 1998 – April, 2001

Mechanical Engineering Department, Assiut University, Egypt

Publications*Author statistics from Scopus*

Total number of publications	27
Total number of citations	588
<i>h</i> – index	13

Patents

1. I. Barbulovic-Nad, H. Yang, M. Abdelgawad, and A. R. Wheeler, Exchangeable Sheets Pre-Loaded with Reagent Depots for Digital Microfluidics, United States patent # US8,187,864B2.
2. N. Mousa, M. J. Jebrail, M. Abdelgawad, R. F. Casper, and A. R. Wheeler, Method of Hormone Extraction Using Digital Microfluidics, United States patent # US 8,202,736 B2.
3. M. Abdelgawad, M. W. L. Watson, and A. R. Wheeler, Hybrid Digital and Channel Microfluidic Devices and Methods of Use Thereof, US Patent Application # US2012083046A1.

 18. P. Phutthavong, M. Abdelgawad, and I. Hassan, Heat Transfer and Fluid Flow in Microchannel Heat Sinks: An Overview of the Current State-of-The-Art, 3rd International Conference on Heat and Mass Transfer, Banff, Canada, May 2003.

Conference Presentations

1. Advances in Microfluidics and Nanofluidics, South Bend, Indiana, USA, 23-26 May, 2013. Poster title: "Repulsion-based model for explanation of contact angle saturation".
2. Micro Flow Chemistry And Biology Workshop (MIFCAB), 7th-8th November, 2012, Dead Sea Jordan. Presentation title: "Digital microfluidics: a new tool in the microfluidics tool box".

3. The First International Biotechnology Innovation Conference (IBIC), Cairo, Egypt, 21-23 November, 2010. Presentation title: "Microfluidic platform for facile cell trapping and single cell analysis".
4. The 14th International Conference on Miniaturized Systems for Chemistry and Life Sciences (μ TAS 2010), Groningen, Netherland, 3-7 October 2010. Poster title: "Microfluidic platform with circular microchannels for facile cell trapping and single cell analysis".
5. The 23rd IEEE International conference on Micro Electro Mechanical Systems (MEMS 2010), Hong Kong, 24th-28th January, 2010. Poster title: "Fast, Simple Fabrication of Circular Microchannels in Polydimethylsiloxane (PDMS)".
6. 6th International Meeting on Electrowetting, Los Angeles, California, 20th – 22nd August, 2008. Poster title: "Optimization of Device Geometry in Single-Plate Digital Microfluidics Devices". Received Best Poster award (offered to best three posters in the meeting).
7. Microfluidics and Nanofluidics 2008, Cancun, Mexico, 21st-24th Feb., 2008. Presentation title: "Master-Printing: An Ultra-Rapid Prototyping Technique for Fabricating Microfluidic Devices".
8. Transducers'07, Lyon, France, 10-14 June, 2007. Poster title: "3D Droplet Actuation in Digital Microfluidics Devices".
9. The 56th Canadian Chemical Engineering Conference, Sherbrooke, Quebec, 15-18 October, 2006. Presentation title: "Rapid Prototyping in Copper Substrates for Digital Microfluidics".
10. The 3rd International Conference on Heat and Mass Transfer, Banff, Alberta, May 2003. Presentation title: "Heat Transfer and Fluid Flow in Microchannel Heat Sinks: An Overview of the Current State-of-The-Art".

Conference Abstracts (name of presenter in italic)

1. *N. A. Mousa*, M. J. Jebrail, H. Yang, M. Abdelgawad, P. Metalnikov, R.F. Casper, and A.R. Wheeler, Estrogen Extraction From Microdrop Clinical Samples by Digital Microfluidics, The 5th International Conference on Microtechnologies in Medicine and Biology (MMB 2009), Quebec City, Canada. 1-3 April, 2009.
2. *M. W. L. Watson*, M. Abdelgawad, and A. R. Wheeler, Hybrid Microfluidics for Pre-Processing and Separations, 23rd International Symposium on Microscale Bioseparations (MSB 2009), Boston, MA USA. 1-5 February, 2009.

Invited Talks

1. "Biological applications of microfluidics", Zewail City of Science and Technology, 7th May, 2014.
2. "Digital microfluidics: a new tool in the microfluidics tool box", Micro Flow Chemistry And Biology Workshop (MIFCAB), 7th-8th November, 2012, Dead Sea Jordan.
3. "Microfluidics: The Power of Small", Egypt-Japan University for Science and Technology E-JUST, 17th October, 2012.
4. "Microfluidics: The Power of Small", The American University in Cairo, Yousef Jameel Science and Technology Research Center, June 2011.
5. "How to be a Good Graduate Student? An Academic Survival Kit", University of Toronto, Civil Engineering Department, Transportation Engineering and Planning group seminar, November 2009.

Funding obtained

No.	Funding Agency	Grant type	Funding amount	Year	Role	Funding Duration
1	Science and Technology Development Fund	Research Support Grant ID # 6905	L.E. 99,600	2014	Co-PI	1 year
2	Science and Technology Development Fund	Research Support Grant (ID#6906)	L.E 72,000	2014	Co-PI	1 year
3	Science and Technology Development Fund	Basic and Applied Research (ID#5525)	L.E. 1,000,000	2014	Co-PI	2 years
4	Grand Challenges Canada	Stars in Global Health (No. 0207-01)	L.E. 670,000 (US\$ 100,000)	2013	Co-PI	1 year
5	Science and Technology Development Fund	Capacity Building grant (ID#4918)	L.E. 4,741,000 (US\$ 750,000)	2012	PI	1 year
6	Science and Technology Development Fund	Research Support and Technology Development grant (ID#4850)	L.E. 100,000 (US\$ 16,000)	2012	Co-PI	1 year
7	Science and Technology Development Fund	Reintegration grant (ID#4081)	L.E. 1,498,000 (US\$ 230,000)	2011	PI	3 years

Project title for each grant in the table is outlined below:

1. Computer vision for the automation of microfluidic platforms used for mechanical characterization of biological cells.
2. Design, Fabrication and Testing of a Micro-Channel Heat Sink for Electronic Devices Cooling.
3. Non-surgical diagnosis of endometriosis: Incorporating clinical, hormonal and biomechanical factors into an integrated model.
4. Development of low-cost equipment for blood tests in under-resourced countries. PI is Prof. Y. Sun from mechanical engineering department, University of Toronto.
5. Establishing the Microfluidics Application Research Unit (MARU) at Assiut University.
6. Microfluidic platform for complete sperm analysis. PI is Dr. Taymour Elsherry from faculty of Veterinary Medicine, Assiut University.
7. Modeling Droplet Actuation in Digital Microfluidics to Enhance its Performance in Biomedical Applications.

Awards and Scholarships

Research

Misr Elkheir Publication award	December, 2012
NSERC post doctoral fellowship (\$40,000/year for two years)	Winter, 2009
Best Poster award, 6th International Meeting on Electrowetting	Summer, 2008
Ontario Graduate Scholarship (\$15,000)	Summer, 2007
Ontario Graduate Scholarship, as an international student (\$15,000)	Summer, 2006
Lachlan Gilchrist Fellowship (\$6,000)	Fall, 2005

Academic

University of Toronto Fellowship (11,000/year for 4 years)	Fall, 2004
Power Corporation of Canada Graduate Fellowship (\$5,000)	Fall, 2002
Concordia University Partial Tuition Scholarship (\$700)	Fall, 2002
Concordia University Graduate Fellowship (\$9,000)	Fall, 2001
Concordia University International Fee Remission Award (~\$4,500)	Fall, 2001
First class honors from Syndicate of Egyptian Engineers	1998
Dr. Mahmoud Hassan Saadawi Award, Assiut University	1997
Dr. Ramadan Mohamed Sadek Award, Assiut University	1996
Dr. Aboelwafa Megahed Award, Assiut University	1994

Community service and leadership

Muslim Students' Association at UofT scholarship	Fall, 2007
--	------------

Supervisory Experience

Graduate Students

1. Derek Pyne (M.Sc. candidate, Mechanical and Industrial Engineering department, University of Toronto, Co-supervised with Prof. Y. Sun): "Digital microfluidics for automating embryos vitrification protocols". September 2011 – January 2014.
2. Hassan Abdelmoumen (M.Sc Candidate, Mechanical Engineering): "Contact angle saturation in digital microfluidics". September 2010 – present.
3. Waleed Salman (M.Sc Candidate, Mechanical Engineering): "Modeling droplet actuation in digital microfluidics". September 2010 – present.
4. Mohamed Farghal (M.Sc Candidate, Mechanical Engineering): "Microelectromechanical systems". September 2011 – present.
5. Abdelhady Mostafa Abdelhady (M.Sc Candidate, Mechanical Engineering): Implementation of image processing techniques in microfluidics applications. September 2012 – present.
6. Ahmad Abdelsalam (M.Sc Candidate, Mechanical Engineering). September 2013 – present.

Undergraduate Students

1. Di Xue (B.Sc candidate, Engineering Science): Mechanical Characterization of biological cells on a Lab-CD (summer research project 2010).
2. Chun Wu (B.Sc candidate, Engineering Science): Fabrication of circular PDMS microchannels for Lab on a Chip applications (summer research project 2008).
3. Philip S. Park (B.Sc candidate, Chemical Physics): Numerical simulation of droplet actuation in digital microfluidics devices using COMSOL multiphysics (summer research project, summer 2007). Research published in *Journal of Applied Physics*.
4. Jared Mudrik (B.Sc candidate, Chemistry): Rapid master fabrication from printed circuit boards for channel microfluidics. Research published in *Lab on a Chip*.
5. Aaron Ming (B.Sc candidate, Engineering Science): Automatic control of droplet actuation in digital microfluidic devices (4th year thesis, Fall 2007 and winter 2008)
6. Anthony Wong (B.Sc candidate, Microbiology): Automatic control of droplet actuation in digital microfluidic devices (summer research project, 2006).
7. George Ye (B.Sc. candidate, Engineering Science): Testing PDMS as a dielectric coating in digital microfluidic devices (summer research project, 2006).
8. Neal Yonson (B.Sc candidate, Chemistry) and Justin Trottier (B.Sc. candidate, Engineering Science): Microcontact printing-based fabrication of digital microfluidics devices (4th year thesis, Fall 2005 and winter 2006). Research published in *Analytical Chemistry*.
9. Patricia Phutthavong (B.Sc. candidate, Mechanical Engineering): Heat transfer and fluid flow in microdevices (undergraduate research project, winter and summer 2002). Research published in *Microscale Thermophysical Engineering*.

Teaching Experience

Assiut University

Sept. 2010 - present

- Instructor for MP221 Engineering Analysis II (class size = 180 students)
<http://www.assiutmicrofluidics.com/courses/mp221-engineering-analysis-ii>
 - Created course website containing all assignments and midterms with their solutions.
 - Added a chapter in the course on using finite element package (COMSOL) as a tool for analyzing different physical phenomena.
 - Dedicated one lecture to introduce symbolic calculation software (Maple) to students.
- Instructor for MP334 Pumps, valves, and pipe networks (class size = 35 students)
<http://www.assiutmicrofluidics.com/courses/mp334-pumps-valves-and-pipe-networks>
 - Modified course contents and created course website to interact with students.
 - Coordinated with Assiut Oil Refinery to add practical part of the course including having one of their engineers giving some lectures in the course.
- Instructor for MP434 Gas Dynamics (class size = 5 students)
<http://www.assiutmicrofluidics.com/courses/gas-dynamics>
- Instructor for MP328 Measuring Instruments (Class size = 41 students)

University of Toronto

Sept. 2004 - present

- Coordinator for Prospective Professors in Training (PPIT) program, which aims at preparing senior graduate students for careers in academia.
 - Helped design program outline and decide which topics to be covered for each seminar.
 - Contacted and confirmed speakers for each seminar
 - Managed program website on Blackboard

- Tutor: MIE414 Applied Fluid Mechanics for 4th year Mech. Eng. students (Fall 2006, 2007, and 2008; class size: 30~60 students; course coordinator: Prof. Axel Guenther).
 - Solved examples on the board every tutorial and helped students with their assignments during office hours.
 - Helped design and run a microfluidic lab experiment for the first time.
- Lab instructor: MIE312 Fluid Mechanics for 3rd year Mech. Eng. Students (Fall 2005; class size: 125 students; course coordinator: Prof. Pierre Sullivan)
- Tutor and Marker: MIE100 Dynamics for 1st year Eng. Students (winter 2005, 2006, 2007, 2008 and summer 2005 and 2006; class size: 45 students courses coordinators: Prof. Leslie Sinclair and Prof. Pierre Sullivan)
 - Solved examples on the board every tutorial and helped students with their assignments during office hours.
 - Designed 2 quizzes per semester and marked biweekly quizzes.

Concordia University

May 2001 - August 2003

- Tutor: ENGR251 Thermodynamics-I for 2nd year Eng. Students (Fall 2001 and 2002; class size: ~40 students course coordinator: Prof. Ibrahim Hassan)
- Tutor and Marker: ENGR361 Fluid Mechanics-I for 3rd year Mech. Eng. students (summer 2001, 2002, 2003; class size: ~50 students; course coordinator: Prof. Ibrahim Hassan)
- Lab instructor: MECH352 Heat Transfer-1 for 3rd year Mech. Eng. students (winter 2002 and 2003; class size: 64 students; course coordinator Prof. Wahid Ghaly)
 - Ran 4 laboratory experiments to demonstrate steady state conduction, transient conduction, radiation, and fin performance.
 - Marked students lab reports.

Assiut University

October 1998 – April 2001

- Tutor and Marker for Fluid Mechanics, Thermodynamics, Mechanics of Machines I and II, and Mechanical Vibrations.
 - Class size ranged from 20 students to 90 students.
 - Tasks included solving examples during tutorials, helping students during office hours, and marking midterms.
 - Supervised many graduation projects for 4th year students.

Professional Development

- Patent information: 4-day workshop in the European Patent Office (EPO) in Vienna, Austria. This workshop introduces the patent system and the various granting procedures and patent information products. It includes an extensive hands-on training on using Espacenet (one of the largest patent databases in the world) as a tool to find patent information.
- IP in Business Practice: 2-day workshop in the European Patent office (EPO) in Munich, Germany. This workshop covers available strategies for licensing IP in addition to IP enforcement.
- Building and Defending IP Value: 2-day workshop in the European Patent office (EPO) in Berlin, Germany. This workshop covers enforcing IP rights, licensing IP, valuing IP and open innovation.
- Patenting and Licensing: 2-day workshop in Politecnico di Torino, Torino, Italy. This workshop introduces researchers to best practices to protect intellectual property (IP), patent search databases, and IP management and exploitation.

- Business development: 3-day workshop in Politecnico di Torino, Torino, Italy. This workshop covers how to build a business plan, assess business opportunity, and do a market research.
- Idea to market: 2-day workshop at the American University in Cairo (AUC), Egypt. This workshop introduced business idea scouting, business planning, forming startups, and business incubation.
- Entrepreneurship 101: 26 hours non-credit course designed to introduce members of the research community to starting and growing a technology based business. Lectures covered a variety of related topics including protecting intellectual property, securing funding, defining markets, preparing a business plan, and hiring employees.
- Prospective Professors in Training (PPIT): one year program at University of Toronto preparing senior graduate students for Academic careers. Program includes a half credit course (MIE3002 Teaching Engineering in Higher Education) and biweekly seminars on how to apply for academic jobs, prepare for the job interview, negotiate your job offer, start a research program, and prepare for different academic challenges facing new professors.
- Teaching Assistants Training Program (TATP): a program offered at university of Toronto oriented toward new teaching assistants to prepare them for teaching duties. Program includes 5 seminars and in-class evaluation of teaching style.
- Graduate Teaching Assistants Professional Development: a 10 hours program offered at Concordia University for professional development of teaching assistants.
- Instructor preparation program: a 30 hours program offered at Assiut University to prepare new graduates for teaching duties.
