**Clinical trials involved in as CO investigator (CO I) :**

- **MORE-RAS-Amgen : site Egy-009 : ( 2015-2018)**  
Protocol Title : Middle east and North Africa Registry to characterize RatE of RAS mutation in newly diagnosed m.CRC
- **TOBER – Roche (2018 -2022 ) :**  
Protocol ID : TOBER ML29794  
Protocol title : A disease registry study to prospectively observe patients patterns and outcomes with HER2 positive unresectable locally advanced or metastatic breast cancer

- **Profile - TAKEDA ( 2019 - 2020 )**

**Protocol ID :**

Protocol title Observational national multicentric retrospective observational study to evaluate real life treatment of Egyptian HD classic type

- **Prostate Cancer Study- Jansen (2019-2020) :**

Protocol ID : ABI-C-17-EGY001-V02

Protocol title: Retrospective Chart Review for Egyptian Patients with Confirmed Adenocarcinoma of the Prostate

- **EMERALD 2 Astra Zeneca (2020- till now ) :**

Protocol ID : D910DC00001

Protocol title: A Phase III, Randomized, Double-Blind, Placebo-Controlled, Multi-Center Study of Durvalumab Monotherapy or in Combination With Bevacizumab as Adjuvant Therapy in Patients With Hepatocellular Carcinoma Who Are at High Risk of Recurrence After Curative Hepatic Resection or Ablation

- **FRYER study – Jansen (2021- till now ) :**

Protocol ID: NOPRODBLC4001

Protocol title : Multi center Cross-sectional Study to Assess the Frequency of FGFR alterations in patients with Urothelial carcinoma in the Middle East, North Africa, and Russia

- **HALO study : - Astrazynca ( 2021 – 2022 )**

Protocol ID : D0818R00007

Protocol title : a cross sectional non interventional , multi centric study to determine the prevalence of homologous recombination repair deficiency among women with newly diagnosed high grade serous or endometrioid ovarian primary peritoneal and or fallopian tube cancer

- **OREIOS study : Astrazynca ( 2022 -2023 )**

Protocol ID : D419CR00025 -

Protocol title : A Multi country , Multi centre, Non interventional, Retrospective Study to Describe the Real-world Management Outcomes in Patients With Unresectable hepatocellular Carcinoma

- **EVOLVE study : Astrazynca ( 2022 – till now )**

Protocol ID :

*Protocol title* : Evolve study on clinical use of Evusheld (AZD7442) as preexposure prophylaxis in real world setting – a multi center observational prospective study to determine the utilization and clinical outcome of Evusheld in middle east and Africa .
