Dr. Ramy Abdelraheem Hassan

Associate professor of Surgery Consultant of HBP and liver transplant surgery

Email: [ramyhassan@aun.edu.eg](mailto:ramyhassan@aun.edu.eg)

*\*I have 6 days of outpatient clinic every month*

*\*supervision of the inpatients ward with my consultant twice weekly*

*\*teaching, 2 groups of undergraduate students every week*

*\*operatively*

*I have 2 lists of HBP surgery per week*

*One list of living donor liver transplant per week*

*One list of general surgery per week*

*One list of upper endoscopy*

*Attending hepatoma group consultation( MDT) every Monday*

*I am responsible for surgical cases every sunday in Assiut university emergency*

## **Practical experience**

**Over all 6 years, I have experience in general surgery , HBP and liver transplant surgery**

abdominal exploration for acute abdomen for many causes	90	65
elective and strangulated hernial repairs with different techniques	130	35
acute scrotum , appendectomies , perforated viscus	100	50

## **General surgery experience**

*I have a 3- year experience as an assistant in Hepatobiliary pancreatic surgery and Living Donor •  
.Transplant at Rajhy liver Hospital (RLH), Assuit University Hospitals, Egypt*

## Teaching experience

*During my 3 years experience as assistant lecturer*

*I am responsible for teaching of the final year and 3rd year undergraduate medical students Also I am responsible for clinical training of resident doctors and house officers*

## Supporting information

*I joined the medical school of Assiut university in 2009. For 7 years . working hard and study were my main work . I graduated in 2015 with excellent grade with honor .*

*I also had shared a lot in the undergraduate student activities . the community activities especially in health were in mind in my city luxor in upper Egypt*

*In march 2016, I started my career as house officer. For one year, I have learned a lot in different departments of our great university " Assiut University". The emergency cases management was my main target ..*

*In march 2017 , I started my residency in the department of surgery in Assiut university . for 3 years , work , education , research were side to side . I had good experience in general surgery elective cases in GIT, Hernias ,HBP, pediatric and head and neck surgeries*

*In emergency and trauma cases , our skills and knowledge markedly increased . I am able to do most of emergency operations ( appendectomies, complicated hernias management ,abdominal explorations , splenectomy ) but I think the best I knew was how to care critical surgical patients and the damage control for trauma patients . all these were supported by courses especially ACLS course by American heart Association in 2019*

*In research, I had my thesis with a title" Prospective Evaluation of Management Strategy of Surgical Obstructive Jaundice in Assiut University Hospital :a Clinical Audit " which was my door to HBP surgery .*

*In 2020 , I finished my master degree and promoted to be an assistant lecturer in Elrajhy liver hospital and joined the HBP and transplant surgery unit.*

*During these 2 years I got a real experience in HBP surgery . Now I can do safe lap cholecystectomy efficiently , open biliary surgery like CBD exploration and shunt operations*

*I also assisted and operated in many times in operation of HBP malignancies .*

*In addition to that I assisted in 20 cases of LDLT in Elrajhy liver hospital with in 2 years*

*For 2 years I regularly attend the HEPATOMA MDT every week that increased my knowledge especially in decision making and radiological evaluation of liver tumor cases.*

*My goal is to be a skilled laparoscopic HBP surgeon.*

*I has 2 classes of formal teaching for undergraduate every week . this helped me a lot in increasing my communication skills and refresh my academic knowledge.*

*Now I am a PhD student I passed the first part in 2021. My thesis title" Impact of splenic artery ligation in living donor liver transplantation for patients with Portal hypertension on early graft function " .*

*I am sharing in other projects that still activating in our hospital .*

*Work hard is my way to achieve my goal to be a skillful laparoscopic HBP surgeon*

## **Current project of my PhD degree**

*:Project title*

*Impact of splenic artery ligation in living donor liver transplantation for patients with Portal .hypertension on early graft function*

*: Aim of research*

*Compare between impact of splenic artery ligation versus non ligation on early graft function , morbidity ,hospital stay and ICU stay in living donor liver transplantation for patients with Portal ..hypertension*
