Title: Pelvi-ureteral stent.

This stent is composed of five parts; the first part is a malleable metallic part 15 mm in length with 2 mm diameter for introduction from the skin to the kidney. The second part is a non-fenestrated tube 12.5 cm in length to be positioned in the upper ureter. The third part is 12.5 mm in length, fenestrated tube to be positioned in the pelvi-calyceal system. The fourth part is a non-fenestrated tube 25 mm in length to be positioned outside the kidney. The fifth part is a fixed connection for urine bag. The tube can be manufactured from polyurethane in different sizes from 4-8 French.
