Funded Projects

Principle Investigator	The role of levonorgestrel intrauterine system in the management of menorrhagia (Funded by an unrestricted Industrial grant)	2003-2005
Co-Investigator	Identification of Bone Morphogenetic Protein 7 and its Receptors in Human Endometrium. (Funded by Mayo Clinic Department of OB/GYN Small Grants Award).	2005-
Co-Investigator	A Prospective Randomized Trial of Medical Therapy versus Radiofrequency Endometrial Ablation in the Initial Treatment of Menorrhagia: Treatment Outcomes and Cost Utility Analysis. (Funded by an unrestricted Industrial grant)	2008-
Principle Investigator	Epigenetic methylation in benign endometrium and endometrial cancer and relation to estrogen and progesterone receptor expression, (Funded through the OBGYN research funding)	2010-
Co-Investigator	Trial of Labor After Cesarean Section: Mayo Clinic Cohort. (Funded by Mayo Clinic Department of OB/GYN Small Grants Award).	2012

RESEARCH PROTOCOLS

Clinical Research Projects:

1.	The role of prophylactic intrapartum amnioinfusion in cases of oligohydramnios –a randomized clinical trial	Completed
2.	Evaluation of the Role of Levonorgestrel releasing Intrauterine System in Management of Menorrhagia	Completed
3.	Global Endometrial Ablation for the Management of Menorrhagia in Women with Coagulopathy	Completed
4.	Hysterosalpingography for Assessment of Efficacy of Essure Microinsert Permanent Birth Control Device	Completed
5.	The Essure-Micro-insert System for Hysteroscopic Sterilization	Completed
6.	A Prospective Randomized Trial of Medical Therapy versus Radiofrequency Endometrial Ablation in the Initial Treatment of Menorrhagia: Treatment Outcomes and Cost Utility Analysis	Completed
7.	Feasibility of Performing ESSURE Hysteroscopic Sterilization Immediately Following NOVASURE Endometrial Ablation	Completed
8.	Different Predictors of the Treatment Outcome after Hysteroscopic Myomectomy	Completed
9.	Long-term Follow up Data and Possible Predictors of Treatment Outcome after Global Endometrial ablation (GEA)	Completed
10.	Extended Prophylactic Antibiotic Use and Surgical Site Infections in Obese Women Undergoing Hysterectomy: A Retrospective Cohort Study	Completed
